PROFILE

Detail-oriented and organized individual with a passion for Fullstack Development, dedicated to crafting seamless user experiences. Seeking a role as a Fullstack Developer leveraging my skills to contribute to innovative projects.

SKILLS

Web development

CSS, HTML, Responsive Design

Frontend framework

ReactJS

Backend framework

NodeJS, ExpressJS

Databases

MongoDB, Firestore

Programming languages

JavaScript, Python, Java, C++

Soft Skills

Time Management, Problem Solving, Attention to Detail

CERTIFICATES

FullStack Software Development Bootcamp by upGrad

March 2023 - November 2023

Walmart USA Advanced Software Engineering Virtual Experience Program on Forage

October 2023

Goldman Sachs Software Engineering Virtual Experience Program on Forage

October 2023

EDUCATION

Bachelor of Engineering (Computer Science), Visvesvaraya Technological University

Mangalore, India

PROJECTS

1. Book Store CRUD App, MERN Stack App

October 2023 – October 2023

github.com/ankit-suman-07/CRUD-BookStore 

- Developed a Fullstack CRUD App using MERN stack.
- Provided users with a wide range of functionality to add, remove, view, and edit book details.

Technologies Used:

- Front-end: HTML, CSS, JavaScript, React
- Back-end: Nodejs, MongoDB, ExpressJS

Key Features:

- Homepage: Created a visually appealing home page with the carousal of the books for the users to view.
- CRUD Functionality: The books can be viewed, details can be edited or updated, and can be deleted.

Achievements:

- Received positive feedback from users and peers on LinkedIn.
- Overcame challenges related to backend integration with the front end.

2. Expense Tracker Dashboard

September 2023 – October 2023

tracker-reactjs.netlify.app/ 

- Created a responsive and user-friendly Expense Tracker Web App.
- Provided users with the ability to add their expenses which are visualized on the dashboard.

Technologies Used:

- Front-end: React.js, Redux
- Back-end: Firestore Database
- Authentication: Firebase

Key Features:

- Dashboard: Designed an intuitive dashboard with interactive data visualizations, including pie charts for category-wise expenses and line graphs depicting monthly expenditure trends.
- Add Expenses: The expenses can be added based on different categories for different dates.
- Responsive: The app is fully responsive and seems immersing on all the devices with different screen sizes.

Achievements:

- Implemented seamless user authentication and secure data storage ensuring data privacy and scalability.
